

### **Confine Box**

The Vissing Agro confine box guarantees enough space for the service people , to allow a good insemination of the sow

The saloon door gives a good access for the sow and as well for the service people , when the door is closed.

You can get the box in a L or XL version

It's possible to combine the box with a stainless steel or polymer trough.

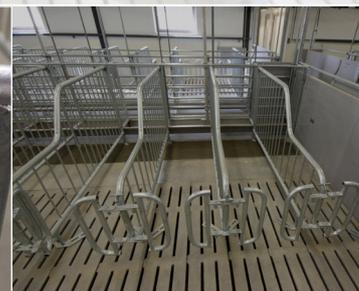

The box is galvanized with a solid foot bracket and fixing material from stainless steel to guarantee a long durability.

## CONFINE BOX

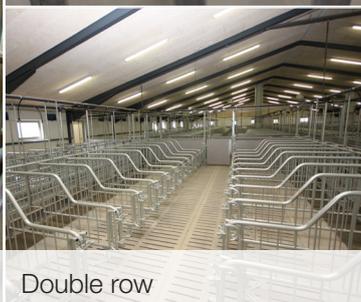

Breeding unit

Alley way

Breeding stalls with saloon gates

Double row

Boar gates
