

MAXI+ feeder

The MAXI+ feeder is ideal for nursery, wean-to-finish and finisher pigs.

All feeder models are built of plastic and stainless steel – a closed 70L plastic hopper with a cover and a feed tube in stainless steel.

Feeders are easy to adjust and easy to clean and are all suitable for both meal and pellet feed.

The MAXI+ feeders are equipped with a molded stainless steel trough, which gives a smooth and hygienic surface.

The MAXI+ feeder program has 3 trough options – weaner trough, wean-to-finish trough and a finisher trough. The width of the MAXI+ feeders is adapted, so they are easy to install in existing barns, when replacing old tube style feeders.

MAXI+ FEEDER

Open for feeding

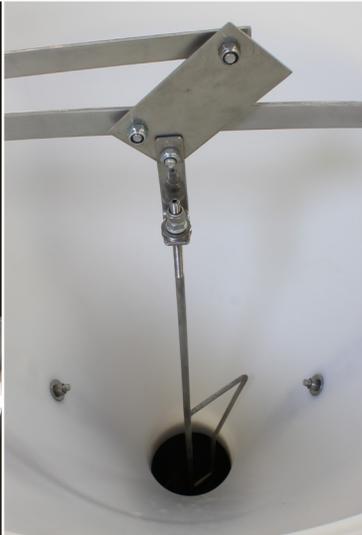

Closed for washing

Adjustment handle for feeding

Feed agitator and adjustment

Feed tube support ring
