

Feeding pans for piglets and weaners

Easy to install - round feeding pans comes with a spring loaded holder system, which is easily attached to the slats.
Long lasting material - plastic and stainless steel.
Very hygienic and easy to clean.

Drinking cups in stainless steel

The drinking cup from Vissing Agro is a well designed cup made of heavy, thick stainless steel material, to assure a strong, long lasting drinking cup. This cup has closed, bent edges to prevent injuries and dirt accumulation. The design of the cup will prevent water wastage and with that help with water savings and reduction of the manure quantity. The cup is delivered with a 10" or 47" water pipe, a drinking nipple and hardware.

Cast Iron

Our cast iron slats have a slightly rough surface to make it skid proof as well a T-shaped rib to ensure optimum manure passage. Each slat has a large manure opening to minimize cleaning time. Long durability. Self supporting, which means installation cost is low.

COMPONENTS

Aqua Mini for nursery

- 30 pigs per cup

Aqua Medium for Finisher

- 30 pigs per cup

Aqua Maxi for Wean-to-Finish

- 30 Weaners or 20 Finisher per cup

Feeding pan in stainless steel for milk and dry feed

- Diameter 35 cm, volume 3.8 liter
